

Raymond Recorder

VOLUME 35

FRIDAY JANUARY 15, 1943.

NUMBER 37

New Town Dam Nearly Completed

The new dam situated in the Hancock coulee on the north-east corner of town is about completed now trucks having been busy this past week graveling the face of it with gravel from Temple Hill as the finishing touch to the construction of the dam proper. The spillway is not finished yet, but this is not such a very big job compared with the dam itself.

Built by the Alberta Construction Co., under contract with the Raymond Irrigation District which organization is financing the dam the earth work started last fall and has continued throughout the winter, the weather being generally favorable to this sort of work. Drag lines, powered with huge caterpillar engines have been going steadily moving the earth until the coulee is dammed to the top with a strong and well built dam, and this last week has seen the gravel face put on the upper side of the structure.

This project was suggested to the Town by the Irrigation district officials, who saw in the storage capacity of the Town's Middle Coulee dam a chance to store irrigation water during the high water season lands east of Raymond and on and spread it over the farm to Stirling during the hot summer season when irrigation water from St. Mary's River gets scarce. They suggested to the Town that after the Irrigation District put up the dam the Town take over and provide the extra pipe, pumps, motors and other essential equipment to put the new water supply source into service. After study by the Town Council this was decided on. Five-eighths of a mile of pipe line will have to be laid from the new dam to hook up with the main pipe line on Broadway and motors, pumps, power lines etc., will all have to be installed when the equipment can be obtained.

It is hoped that with living water flowing into the canal during the high water season of the spring and the overflow from the flood over the coulee during wet seasons of the summer that fresh, soft water will be available for use in the Town throughout the entire year.

T. Geo. Wood, District Manager of Canadian Sugar Factor Ltd left Sunday evening on a business trip that will take him to Montreal and back, stops being made in all principal cities enroute. P. T. Rogers will accompany him on part of the trip.

LEGISLATURE OPENS FEBRUARY 18TH

Third session of the ninth legislature will open Thursday, February 18, it was announced this week by Premier Aberhart, following a full cabinet meeting. An order in council formally calling the session has been signed. Although he did not forecast the trend of legislative enactments to be brought down, the premier said that it was possible the session would be shorter than usual. Revision of the statutes is proceeding, and for that reason the number of bills introduced will be kept as low as possible. One extra-legislative difficulty that out of town members will have to face is the housing shortage. Already they are seeking accommodation, and Edmonton has practically no accommodation these days.

PROGRESS REPORT ON THE LOCAL CAMPAIGN OF CANADIAN AID TO RUSSIA FUND

"If there is any chance of Victory in 1943, and who can say that there is not, this chance has been made more probable by the heroic resistance of our Russian Allies. Canadians in all walks of life can show their appreciation by supporting with donations of money and clothing the Canadian Aid to Russia Fund whose object is to help alleviate the awful suffering amongst the seventy million Russian civilians whose homes have been devastated by the Invader, who face the terrible Russian winter without adequate food, shelter or clothing."

It is a common desire throughout the country to attain the initial objective of this campaign by the end of this month. There remains, therefore, no time to lose for sending your donations.

We are glad to report that the local campaign has been proceeding satisfactorily.

A dance with special features in support of the Fund is arranged for the near future.

Rally to this event or send your contributions to the Local Branch of the Bank of Montreal.

Clothing campaign for the needy Russians is also under way now. All are requested to send clean, warm, new and used clothing, bedding, shoes, etc., to J. Horvath's shop in King Motors building, Broadway here in your home town.

The following are the contributions received to date: Previously acknowledged

Canadian Legion, collected by E. Wagstaff	3.50
Board of Trade, collected by J. W. Evans	6.50
R. W. Hunter	10.00

TOTAL \$134.65

RAYMOND BRANCH, Canadian Aid to Russia Fund

Our High School Basketball team lost their league game at Stirling last Friday night after a hard fought forty minutes. The local squad play host tonight to the Magrath Hi.

A new heating boiler is being installed in the Opera House. The old heating boiler from the Sugar Factory has been purchased and is replacing the old on which has served for so many years.

Town Council Meeting

Regular meeting of the Town Council was held Monday night last and routine business occupied most of the meeting. The payroll was passed and ordered paid.

L. Brandley was present, regarding removing his home and buildings from the Town Tax Roll and including it in the Municipality. This was decided on and the Council also agreed on a basis of supplying water for the property.

Geo. E. Court was appointed Returning officer for the Town election soon to take place and Nomination Day was set for Monday, February 1st, 1943.

Retiring members of the Council are: Mayor P. W. Cope and Councilmen J.H.L. MacPhee and J.B. A. MacLean.

Factory Run Will Finish Next Week

The 1942-43 Sugar Factory campaign will finish the first part of the week after 115 or 118 days of continuous operation. Estimates vary from the early hours of Saturday morning till sometime Monday for completion of the slicing and then there will be from 50 to 60 hours for the wash up and boiling of the last of the sugar until being shut off as they finish their work.

The last of the car beets arrived in the yards last Friday, the shovel which has been loading the beets arrived from Taval in the wee small hours of Friday morning and is busy now loading pulp and putting beets on the belt.

The season locally was too cool and wet for first quality beets, the fibre of them being stringy and tough. This has necessitated extra treatments to the juices to maintain the high

quality of the sugar and at times has slowed up the extraction of the sugar.

When the last of the juice has been boiled into sugar the machinery will be shut down, the boilers cooled and drained, and then the annual overhaul will take place.

Miles and miles of pipe, hundreds of valves of all sizes, hundreds of electric motors, dozens of pumps, all to tear down, overhaul, renew worn parts and get them ready again for the fall campaign of this year.

This has been a good lengthy campaign and had the crop yielded as was expected the campaign would have lasted until the first of February or longer. We can now start looking forward to the 1943 campaign and hope for all that we didn't get in this year.

Aid To Russia Fund

GENERAL APPEAL TO ALL LOCAL ORGANIZATIONS AND CITIZENS OF RAYMOND AND DISTRICT

In connection with the present campaign of Canadian Aid to Russia we have just received from the National Headquarters of the fund, the detailed information on the clothing part of the drive aimed at providing the needy Russian people with warm clothing.

The Local Committee feels sure that you will be willing to share your used clothing with our Gallant Allies.

With this in mind we have approached John Horvath who readily agreed to head up the sub-committee in charge of clothing collections. He placed at our disposal his shop as a depot where to receive your

donations in clothing.

We hereby appeal to all of you interested in helping the Russian Effort for all kinds of clean warm clothing including shoes, in good wearable condition also good warm bedding etc.

The present news from Russia is very good indeed, but we should remember that the more territory that is freed from the German invaders, the more help will be needed by the liberated civilians.

Let us express our admiration and gratitude to the very brave but needy Russian people by sending your used clothing and inducing others to send their in care of J. Horvath shop at King's Garage here in town.

The Local Committee Canadian Aid to Russia Fund, John Landysheff, Chairman R. Pack, Secretary J. R. Wells, Treasurer.

NEWS NOTES

A. E. Hancock was a business visitor in Lethbridge last Saturday afternoon.

R. G. Bryne was in Lethbridge on business Saturday last.

Messrs Ward and Armstrong Treasury Branch Inspectors have been at the local branch the past week.

Bruce Heggie went to Calgary last week end to join up. When he left Raymond he was undecided whether it would be the Army or Air Force.

Feeding of wheat and coarse grains on prairie farms is quite heavy this fall due to the early winter. The prairies are now snow covered, a situation entirely different from the experience of the past two autumns.

During the latter part of November some 11 million bushels of grain were cleared down the Great Lakes from Fort William-Port Arthur. Of that total seven million bushels were wheat, and the balance oats and barley moving to United States ports.

Paul V. Karpink, New Day-ton, has recently enlisted in the Canadian Army and is in training at Calgary.

A very interesting meeting was held in the Raymond Second Ward Sunday evening last when Mr. and Mrs. J.H. Walker were the speakers of the evening. A large crowd was in attendance.

Reports from Europe indicate that a long drought in the Balkan countries was broken by rain late in November. An effort is being made there to seed as much acreage to wheat as possible, but lack of labor is holding up the program.

Sunday night was Family night at the Raymond 1st Ward and E. E. Jensen had charge and delivered a fine sermon, his wife reading a poem, Mrs. Doris Jensen gave a story and Miss Leta Jensen rendered a number on the violin and Miss Jeannine Wilde sang a solo. A large crowd was present to enjoy the evening, the Family night each month being a high light of the First Ward meetings.

Charles Huddle Passes-- Funeral Thursday

BRIGHAM YOUNG UNIVERSITY

Despite transportation difficulties and other wartime conditions, Brigham Young University has attracted students from most sections of North America and from Hawaii. Twenty-eight states from California to the Carolinas are represented. Canada, Mexico, and Hawaii have also sent a sprinkling of students.

Courses of study that are emphasized at BYU this year are those which will aid in winning the war. Mathematics and Physical Sciences are being taught all men enlisted in the reserves of Army, Navy, Marines, or Coast Guard and studying toward an officership on a "deferred service" basis. Portuguese has been added to the languages available for aviators and translators. For those who wish to fill emergency or war industry positions varied business classes are offered.

There are also physical education, home economics, sanitation, and scientific agriculture (food for freedom) for those interested in these courses.

A large group of men are taking advantage of the primary and secondary programs of the Civil Pilot Training course. A new unit of this work begins every eight weeks.

There are two students from Raymond Alberta, Canada attending the "Y" this quarter. They are: Olive Brandley and Margaret Brandley.

Union Jacks Defeat Claresholm

Raymond's Union Jacks, perennial Basketball Champions of Alberta, won their first league game of the season here Wednesday night when they defeated the Claresholm Air Force team by the score of 53-25. It was just too much Jacks all the way through, the boys throwing up a defence that the visitors couldn't get through.

It was a good game and R.A.A. officials state that it is the best that should bring out some fine beginning of a series of games play. Next Wednesday another service team featuring some Pacific Coast players will be here.

A town league preliminary between Stone's and the Marquette team furnished bushels of fun, the former winning by a 1 point margin.

Mr. and Mrs. R. W. Thomson are spending a two weeks holiday with the Thomson and Romeril families in Magrath. Raymond Rulon is with the R.C.A.F. stationed in Calgary.

I Kitchen, Electrical engineer of the Sugar Co. was ill for a day or two this week.

Music Club Meeting

The Music Club held their meeting at the home of Mrs. Muriel Terry, January 4, with Doris Thompson assistant hostess and fifteen members present and one visitor, Mrs. Winnie Strong. Doris Court reviewed the book "Schumann Reink". Piona solo by Leah Jones and the group sang several songs. A Valentine party was planned for February 1st in the 2nd Ward for members and partners. A delicious lunch was served.

H. Chas. Huddle, an old-timer of Raymond, passed away at the home of his daughter Mrs. C. Winters, Tuesday morning about 1:30 a.m., having been in failing health for some months. He was in his 84th year and would have been 85 next June. Mrs. Huddle predeceased him about three years ago.

Mr. Huddle was a native of England and was by profession a carriage painter. During his early years in Raymond he worked some at this pursuit, and then worked into general painting which work he followed for a long while until his advancing years forced him to retire. He was a splendid craftsman and took a great delight in his work. His hobby was music, and he was a very talented organist, and was in real enjoyment when he could sit down at an organ and spend an hour or so playing the classics of past years. For many years he was church organist in his branch in the old country, and also in the First Ward, and was always ready to fill in when needed. He was an active member of the L.D.S. Church and was a member of the High Priests quorum of the Stake.

He was the father of a large family, six children still surviving some in California, some in British Columbia and some in Alberta. We express our sympathy to them in their loss.

FUNERAL SERVICES

Funeral services for deceased were held in the First Ward Chapel Thursday afternoon, January 14th at 2 p.m. with Bishop J. O. Hicken in charge. The choir was conducted by Ira McBride, with Roi Stone at the Organ and members of both Ward Choirs assisting. The good attendance and the profusion of flowers were silent tributes of the esteem in which deceased was held by all who knew him.

The opening song was "Oh My Father" invocation by Elder A. E. Fawcett and the second hymn was "Abide With Me" followed by a Vocal Trio "Crossing the Bar" by Mesdames P. L. Dahl, Scott Salmon and L.L. Palmer.

Elder C. E. Allred was the first speaker, relating some of the early family history. Deceased came to Raymond 1909 from Doncaster England where he labored as a carriage painter. He was nearly 85 years old and had a deep and abiding testimony of the Gospel which he understood and loved very dearly.

"I Know My Heavenly Father Knows" was played as an Order of prayer by Roi Stone. In a few closing remarks Bishop Hicken thanked all who have assisted during deceased's illness and paid tribute to Chas. Huddle for the fine life he had lived and the fine family left to bear his name. The choir sang "Shall We Meet Beyond the River" and Elder Jas. S. Anderson offered the benediction.

A large number of cars accompanied the remains to the cemetery where the grave was dedicated by Elder J. Golden Snow.

A.J. Lancaster, Metropolitan Life Insurance Agent was a Raymond visitor Monday last.

Teddy Allan left for Edmonton last week to take a course in Acetylene and Electric Welding.

WHO CONTROLS THE MARKET

Why did eggs slump so badly the first of this month? Why with strict rationing of beef, eggs and so on? in Britain, should we have so many empty feed lots in Southern Alberta this winter? Why is the Dominion talking of rationing beef, and at the same time making markets so uncertain that many of our feeders are not feeding beef this winter? Are our markets controlled by the Government independently and are prices set according to demand and with some consideration of the producer, or does the tail wag the dog and the Government do what the packers tell it to do? These are the questions people are asking every day. Beef growers and feeders voice the opinion that prices are set not by the government but by the packers who tell the government what and when to do. Poultry raisers wonder if the feed market or the Canadian packers influence the Government in setting egg prices. Who has the answer?

A large egg in Raymond dropped 10 cents one day. Does it seem reasonable that a few thousand extra dozen could cause that? Did the British market slump that much in a few hours. Last spring our Government officials pled with people to increase their egg production, stating that the demand would ensure a heavy demand and a good price for all Grade A eggs that could be produced.

People paid high prices for chicks, high prices for building material, and higher prices for chicken feed because of the pegged price of wheat and then just as flocks come into good production down go prices. Is it any wonder that producers wonder if price control isn't really

price manipulation. Beef feeders because of market uncertainty are not feeding. Couldn't this be avoided?

Will producers be forced into combines like the manufacturer in order to get a square deal? Are we going to have to regiment the producers of our feed and livestock in great combines who will outline policies and programs and set prices with a thought only for themselves? Maybe that's what we need, and something like that might be the outgrowth of the present unfairness in government policies, which protects some and sacrifices the interests of many for the benefit of the few.

Has the British egg market ceased to exist? Isn't a Grade A egg worth as much powdered as it is fresh? While the Wartime Prices and Trade Board is putting the teeth in things, can it provide that producers of our top quality eggs, beef, pork, mutton and so on, get a price that will guarantee safety and a profit to these producers?

INTERPROVINCIAL SHIPMENT OF CHICKS

The cancellation of all Hatchery Agents licenses has created a considerable amount of misunderstanding. Many believe that the interprovincial shipment of chicks is not now possible. This is not the case. Farmers can order their chicks direct from any approved hatchery or approved breeder, not only in Alberta but in any other province. The only change at the present time is that there are no hatchery agents.

Intending purchasers of chicks are advised to place their orders direct by mail, phone, or personally, with the hatchery or breeder from whom they wish to secure their chicks either in Alberta or outside of the province. If you so desire you may place your order with your local hatcheryman for outside chicks and have them shipped direct to you thus saving delay thru reshipment. We repeat that purchasers of chicks are not prevented from procuring their chick requirements from any approved hatchery or approved breeder in Canada, but we do advise you to place your order without delay.

Land in North China

The average annual rainfall in Shantung province, North China, varies from 14 to 21 inches. Some districts, therefore, have slightly more rainfall than Winnipeg and others about the same as central Saskatchewan. It is an agricultural province, and has been for some 4000 years. There are about 181 persons per square mile! Surely we can learn some lessons from them.

They have preserved their soils by preventing erosion. This has been largely achieved by very skilful tillage methods developed through generations of experience and, also, by terracing slopes and hill-sides. Wheat, oats, cotton, millet and potatoes are the leading crops.

One of the chief factors in the maintenance of fertility has been manure. Every possible scrap of animal excreta, including man's, is worked into the soil.

We have yet to learn that farm-yard manure is one of our greatest potential assets. Most of it is wasted. It will certainly play an important part in any soil conservation programme we may undertake, and we should be using it now.

Farmyard manure should be spread on the land while fresh and preferably on land to be followed the following summer. If it must be piled, the piles should be high, compact and flat topped.

Some day we may realize the agricultural value of town and city sewage. The chief difficulty in its use has been the large volume of water. At least two towns in England have overcome this by "composting" sewage with other organic wastes. The resulting fertilizer sells for \$2.50 per ton, and the demand greatly exceeds the supply.

A CHANCE FOR FARM WOMEN

The two parents of the United States and Canada both tell us that there will be a decided shortage this coming year of all livestock and livestock products, and that perhaps all these products, i.e. beef, pork, bacon, butter, cheese, cream, poultry and eggs, may have to be rationed. It is very difficult for farmers to increase suddenly livestock flocks and herds. The number of laying hens can, however, be quickly increased. Here is a chance for the farm housewife to make some extra money. Those who are not now keeping poultry might put in from 25 to 50 hens. (There is ample grain for feed, as hens will produce

eggs with a main diet of wheat.) Farm women who now have flocks might arrange to increase them somewhat.

The purchase of baby chicks is perhaps the easiest way to acquire laying hens, but if these are unobtainable, to set a mother hen on fertile eggs in the old-fashioned way will bring good results. Eggs are high in price as compared with the price of wheat and will, no doubt, continue to be high because all livestock products, just as we are told, will be scarce this coming year.—Searle Grain Company, Ltd.

A new storm door entrance has been put in the Town Hall. Having this vestibule closed will make the building a great deal warmer.

WEEKLY LETTER

PASTURES PROVIDE CHEAP FEED

Grass is the crop on which agriculture found its origin and it is still a basic crop in modern agriculture production. In fact, without adequate grass in one form or another the live stock producer could not exist. This being the case it behooves us all to handle our grassland with the respect and care that it deserves.

On the irrigated farms the problem of establishing and maintaining high yielding pastures is relatively simple. And yet there are very few farmers who have adequate pastures for their stock. This is especially true of those farmers who have milk cows and that includes almost all. The milking cow especially requires the special nutrients found in young green grass. After she has been on dry feed for the long winter that we have, her body needs building up and refreshing. Good pasture can do this much more effectively than any other feed or tonic.

Grass harvested by live stock provides the cheapest form of feed we can raise. From the early summer to well into the fall, pastures can provide all the feed required by the average cow or any other class of grazing animal. But to do this the pasture must be more than a well worn and soiled mainly as an exercise field. To produce high yields it must be given care and attention equal to that given to cash crops such as sugar beets. Without proper care good yields cannot be obtained.

When one drive through the country during the summer and observes the number of cows wearing pokes or other restrictive devices it is evident that many cattle are not getting enough to eat. In other words they are being restrained to a field in which they go hungry. Otherwise there would be no need of using these extra appliances to keep them in. None but the ornieriest of cows will climb fences as long as she has

enough to eat in her own field. It seems obvious that the thing to do is to provide this adequate feed and not starve the poor cow. A half starved cow never was a good milk producer.

Another advantage to be gained from good pasture is a reduction in labour requirements. Once the pasture is well established the cows do all the work of harvesting the feed. If at the summer feed requirements were met in this way there would be no need of spending time and energy in harvesting and feeding crops during the summer months.

Specific suggestions regarding certain features of pasture management will be included in the next letter.

POSSIBLE BAN ON WHEAT PRODUCTION

The Winnipeg Tribune printed a news story last Saturday to the effect that government officials at Ottawa were considering a proposal to prohibit the production of wheat in prairie districts least suited to its production and limiting the acreage to districts where only wheat is the main source of farm income.

This would mean, according to the Tribune's story, that large portions of Manitoba and the central and northern sections of Saskatchewan and Alberta would not be permitted to grow wheat.

Hon. J. G. Gardiner, federal minister of agriculture, said he had never heard of any consideration being given a plan to forbid the growing of wheat in large sections of the prairie provinces. He stated, "I cannot imagine anyone discussing a program of forbidding the growing of wheat in certain areas with any hope of such program operating effectively."

It is believed, however, that some plan for restricting wheat growing in prairie provinces is under consideration. While this may not take the form of actually forbidding farmers in certain areas to grow wheat it may curtail or eliminate deliveries.

The prospective Canadian wheat carryover on July 31st, 1943 is 700 million bushels. This is enough to supply domestic demands and the requirements of the export market for at least two years, even if no wheat is grown in that period. —Wheat Pool Budget.

TIME BOMBS

If you want to get the system out of a mess, first get the mess out of your system.

Canada must buckle down or she will buckle up.

The Long and the Short of It Short on rubber, short on gas,

Short on coffee, short on tea, Canada, what will she be?

Long on courage, long on fight, Canada toils though the night. Long on spirit, long on men, She'll rebuild the world again!

We must either face the future with self-sacrifice or leave our children to face the music.

We hear some complaints about how "awful" the wartime restrictions are. But it's far better to have our own Government take away our privileges than to have the enemy take them away. These aren't the awful things. It's the things that are happening in Greece, and Poland, and France, and Holland, and Norway that are awful.

It will take more than just a war to clean up this world. It will take plenty of govt.

WOMEN VERSUS NEWSPAPERS

They both have forms. They both include bold face type.

They always have the last word.

Back numbers are not in demand.

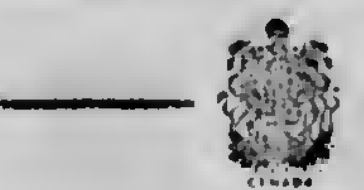

They have a great deal of influence.

They are well worth looking over.

They carry the news wherever they go.

If they know anything, they usually tell it.

They are never afraid to speak their own minds.

MILITARY CALL-UP

Attention!

* SINGLE MEN *

A proclamation recently issued by His Excellency, the Governor-General, requires that every single man, born in any year from 1902 to 1923, both years inclusive, who has not already received a notice or order to report for medical examination under compulsory military service, must fill out a special form at the office of a Postmaster, a Registrar of a Mobilization Board or an Employment and Selective Service Officer not later than February 1st, 1943.

For this purpose the term "single man" also includes any male person who was a widower, or legally separated or divorced, and without a child or children dependent on him at July 15, 1940, or any such male person who has suffered the loss of his dependent child or children after that date; and any male person who, though married at July 15th, 1940, since that date became a widower, legally separated or divorced, and is now without a child or children dependent on him.

Please observe that single men who have received notices to report for medical examination under the military call-up and who have been examined as required, or men who are now in the Armed Forces, are NOT included in those to register by February 1st.

Penalties are provided for failure to register.

A. MacNAMARA
Director, National Selective Service
Ottawa

Dr. G. Fred McNally, deputy minister of education for Alberta, has been named chairman of the dominion vocational training council, an advisory body set up to guide Labor Minister Humphrey Mitchell. Announcement was made by the labor minister this week. Others who will serve on the council include Norman S. Dewd, Canadian Congress of Labor; E. R. Complin, Canadian Industries, Ltd.; Dr. L. A. Corbett, Canadian association for education and representatives of labor industry, education federal government from various Canadian points.

DANGER OF DISEASES IN CROWDED POULTRY

There are well over nine million more hens and chickens on the farms of Canada now than there was at this time a year ago, so there will probably be more crowding in many poultry houses this winter. This means says Dr. A. E. Cameron, Veterinary Director General for Canada, the danger from fowl typhoid and fowl cholera may be increased. He advises poultry raisers to isolate newly purchased birds from the home flock for a reasonable time as a precaution against the spread of the diseases mentioned. Strict sanitation is the most important factor in guarding against them, says Dr. Cameron.

And here is another tip from him to farmers who raise both poultry and swine. Keep the poultry out of the hog lots, in fact keep them well away from where the hogs are housed. Many hog producers do not realize the danger to hogs which lies in the type of tuberculosis carried by poultry. Too many hog carcasses are being condemned at the packing plants due to tuberculosis caused by poultry infection he says. Another good practice is to institute a sound tuberculosis control
